## **Non-IFRS Measures**

The term "Adjusted EBITA" refers to net income before adjusting for finance and other income, finance costs, income taxes, share in net income or loss of equity investees, impairment of non-financial assets, amortization, and foreign exchange gain or loss. The Company believes that Adjusted EBITA is useful supplemental information as it provides an indication of the results generated by the Company's main business activities prior to taking into consideration how those activities are financed and taxed and also prior to taking into consideration intangible asset amortization and the other items listed above. "Adjusted EBITA margin" refers to the percentage that Adjusted EBITA for any period represents as a portion of total revenue for that period. Previously the Company has reported "Adjusted EBITDA" in certain financial disclosures, but has

determined that Adjusted EBITA is a more meaningful measure going forward. Adjusted EBITDA refers to Adjusted EBITA as defined above then further excludes depreciation. The Company uses depreciation as a proxy for the cash flows used to purchase property and equipment required to support the Company's main business activities. As such, the Company believes Adjusted EBITA is a more useful measure than Adjusted EBITDA.

“Adjusted net income” means net income adjusted for non-cash expenses (income) such as amortization of intangible assets, deferred income taxes, and certain other expenses (income). The Company believes that Adjusted net income is useful supplemental information as it provides an indication of the results generated by the Company's main business activities prior to taking into consideration amortization of intangible assets, deferred income taxes, and certain other non-cash expenses (income) incurred or recognized by the Company from time to time. “Adjusted net income margin” refers to the percentage that Adjusted net income for any period represents as a portion of total revenue for that period.

Adjusted EBITA and Adjusted net income are not recognized measures under IFRS and, accordingly, readers are cautioned that Adjusted EBITA and Adjusted net income should not be construed as alternatives to net income determined in accordance with IFRS. The Company's method of calculating Adjusted EBITA and Adjusted net income may differ from other issuers and, accordingly, Adjusted EBITA and Adjusted net income may not be comparable to similar measures presented by other issuers.

The following table reconciles Adjusted EBITA to net income:
